

ORDER GOVERNING COURT REPORTING AT PUBLIC EXPENSE

Pursuant to Florida Rule of Judicial Administration 2.535(h)(3), the chief judge, after consultation with the circuit court and county court judges in the circuit, shall enter an administrative order developing and implementing a circuit-wide plan for the court reporting of all proceedings required to be reported at public expense.

THEREFORE, IT IS ORDERED:

A. FUNDAMENTALS OF COURT REPORTING PLAN

1. Scope

Court reporting at public expense in the Ninth Judicial Circuit is managed and provided by the Office of Court Administration, Court Reporting Services. Court Reporting Services is responsible for ensuring that proceedings mandated by law to be recorded at public expense are recorded at the highest quality attainable; that accurate transcripts are prepared; that public records requests are responded to appropriately; and that the record is retained and archived as required by law.

The court reporting plan set forth in this Order delineates procedures to be followed for all proceedings required to be reported at public expense. In any proceeding in which the types of court reporting equipment or services specified in this Order are not available, Court Administration may utilize any court-employed court reporter or court equipment, or services with which it has contracted, without further order of the Court except in capital cases. Under emergency or any other exigent circumstances in which contracted services, personnel, or equipment are not available, Court Administration may utilize whatever other means of reporting is available under the circumstances, but must notify the Chief Judge of the exigency as soon as possible.

2. Court Reporting Model

The Circuit utilizes a hybrid model of court reporting for accurately capturing the record in all judicial proceedings where court reporting is required at public expense. The hybrid model

combines the use of stenographic equipment and electronic digital recording. The Circuit may, on occasion, contract with independent court reporters and transcriptionists, all of whom also meet the definition of “approved court reporter” and “approved transcriptionist” as set forth in Florida Rule of Judicial Administration 2.535(a)(1) and (2).

Upon approval from the presiding judge, magistrate or hearing officer, parties may bring their own privately retained court reporter, however, the proceedings shall still be digitally recorded by a digital court reporter or official court reporter, and the Court’s digital recording or the official court reporter’s notes will always provide the basis for the official record. If a discrepancy occurs in a transcript produced by means other than the Court’s digital recording or by an official court reporter, the transcript prepared from the Court’s digital recording or by an official court reporter is the official record.

3. Real-time Court Reporting

Real-time court reporting is transcription by official court reporters which delivers transcription within a few seconds of the words being spoken. Real-time court reporting is limited to capital case proceedings, if available. Real-time court reporting for other types of proceedings will only be provided with Chief Judge approval, in consultation with the Manager of Court Reporting Services, and only when services are available.

4. The Record

Only one official record may be produced. In the event that a court proceeding is recorded electronically and by an Official Court Reporter, the record generated by the Official Court Reporter shall be the official record.

For all proceedings in which the Court is required to provide a record, the “official record” is the transcript, which is the written record of court proceedings as produced by an approved court reporter and filed with the Clerk of the Court. The “official record” does not include CDs, DVDs, tapes, or any other electronic record of a court proceeding nor does it include any transcript of a court proceeding produced by a party or other entity not authorized by this Order.

5. Priority

Priority in the production of transcripts shall be given to capital cases, including capital postconviction cases, termination of parental rights, juvenile dependency, and other cases entitled to priority under Florida Rule of Judicial Administration 2.215(g).

6. Death Penalty and Capital Postconviction Proceedings

Whenever possible, real time computer aided transcription qualified court reporters, employed by the Chief Judge as members of the Court Reporting Services Department, shall be used in all death penalty cases and capital postconviction proceedings in both Orange and Osceola counties. Upon completion of such proceedings, and if a transcript is requested, the Court Reporting Services Department shall deem the transcript request a priority and shall place it before all other non-capital transcript requests, regardless of the timeliness of those other requests. Additionally, the court reporter assigned to prepare the transcript in the capital case shall be removed from court coverage and relieved of all other nonessential duties until such time as the transcript has been completed and filed. Motions seeking an extension of time for preparation of the transcript shall be presented to the Chief Judge for approval or denial.

7. Court Orders

It shall be at the discretion of the Manager of Court Reporting Services to require a court order for transcription for any transcript that has not been requested for appeal and is requested as expedited or during those times when resources are limited. Each request will be handled on a case-by-case basis. Such order must be specific, and must include the dates of the requested proceedings, judge, and date transcript is needed.

Except for appeals a court order is required for a transcription of any digitally recorded court proceeding an hour or longer in duration.

8. Tapes Played and Offered as Evidence at Criminal Proceedings

When an audio or video tape recording is offered in evidence at any criminal proceeding, the court reporter shall report or record the contents of the tape as it is played at the criminal proceeding. The court reporter is only obligated to make a good faith effort to report or record the contents of the audio or video tape because a verbatim transcript may not be possible if the tape or a portion of the tape is inaudible.
